

## PROFILE

My name is Dinija Seferović. At the moment I am a Software Engineering and Information Technology student at Elektrotehnički fakultet Sarajevo. I find myself a very motivated, ambitious and creative person, a lifelong learner. My specialities include quickly learning new skills and programming languages, problem solving, optimization and design principles. I am enthusiastically grabbing onto any programming languages, frameworks or principles I can integrate into the colorful and fun coding web in my head. Front-end development calls to all my passions; it incorporates creativity, problem solving and design, and that is what I aspire to do in upcoming years.

# DINIJA SEFEROVIĆ

## EDUCATION

**Faculty of Electrical Engineering, University of Sarajevo**  
**Software Engineering and Information Technology**

Expected graduation: 2022

Successfully completed several individual and group projects in different programming languages during the studies so far. They can be found on my GitHub profile and my portfolio.

## WORK EXPERIENCE

### Graphic design freelance

2019 – 2022

Freelance and work with clients from different parts of the world on smaller graphic design projects. This experience primarily helped me to improve my professional communication skills and communication in English, responsibility for the on-time delivery of the desired end-product and the concepts and rules of graphic design.

## SKILLS

Great knowledge of programming languages and frameworks:

- C, C++
- Java, C#, JavaScript
- Kotlin
- ASP.Net Core
- HTML+CSS

Excellent knowledge of English and German languages
